Professional Summary

Software Engineer with 4+ years of experience designing and developing enterprise-grade software solutions. Strong expertise in **C#, ASP.NET Core, REST APIs, SQL Server, and Object-Oriented Programming**. Hands-on experience with **microservices, event-driven architecture using RabbitMQ**, and containerized deployments using Docker. Experienced in Agile/Scrum environments, solving complex problems and delivering scalable, high-impact solutions.

Professional Experience

Software Engineer

June 2021 – Present

Symplr

- Designed, developed, and maintained enterprise applications using **C#, ASP.NET Core, and SQL Server**.
- Built and consumed **RESTful APIs** supporting high-volume internal and external users.
- Applied strong **OOP principles, SOLID design principles, and design patterns** to build reusable and maintainable components.
- Implemented **event-driven architecture** using **RabbitMQ** for asynchronous and scalable system communication.
- Modernized legacy systems by decomposing them into **microservices**, improving performance and scalability.
- Containerized applications using **Docker**, enabling consistent deployments across environments.
- Contributed to CI/CD pipelines using Azure DevOps, improving build reliability and deployment efficiency.
- Collaborated with cross-functional teams to analyze business requirements and articulate effective technical solutions.
- Participated actively in Agile/Scrum ceremonies including sprint planning, reviews, retrospectives, and daily stand-ups.
- Conducted code reviews, improved existing solutions, and mentored junior engineers.

Key Projects

Enterprise Task Management System

Angular, ASP.NET Core, SQL Server

- Designed and developed a task management application serving enterprise users with secure role-based access.
- Built backend services using ASP.NET Core and REST APIs following clean architecture principles.

Expense Tracker and Budget Management System

ASP.NET Core, Angular, JWT Authentication

- Developed a finance management system enabling expense tracking, budgeting, and reporting.

- Implemented secure authentication and authorization using JWT.

Technical Skills

Programming Languages: C#, JavaScript, TypeScript, Python, VB.NET

Backend Technologies: ASP.NET Core, REST APIs, Microservices, RabbitMQ

Frontend Technologies: Angular, HTML5, CSS3, SCSS

Databases: SQL Server 2016+

Cloud & DevOps: Docker, CI/CD Pipelines, Azure DevOps, Git

Software Engineering: OOP, SOLID Principles, Design Patterns, ALM

Methodologies: Agile, Scrum

Education

Bachelor of Technology in Mathematics and Computer Science

Delhi Technological University, New Delhi
